# How to get up from a fall 2. Rise

## 1. Prepare

Getting up quickly or the wrong way could make an injury worse. If you are hurt, call for help using a medical alert service or a telephone.

Look around for a sturdy piece of furniture, or the bottom of a staircase. Don't try and stand up on your own.

Slowly get up on your hands and knees and crawl to a sturdy chair.

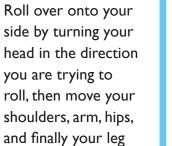

Push your upper

body up. Lift your

head and pause for

a few moments to

steady yourself.

over.

Place your hands on the seat of the chair and slide one foot forward so it is flat on the floor.

### 3. Sit

Keep the other leg bent with the knee on the floor.

From this kneeling position, slowly rise and turn your body to sit in the chair.

Sit for a few minutes before you try to do anything else.

Talk to your primary care provider about having a fall-risk evaluation. The fact that you have fallen once means you have a high risk of falling again.
